

You want to load those  
records *now*?

*E-books in the NEOS consortium*

# Ebooks

# Ebooks within NEOS

# Collection Development

- collections decisions made at the individual library level
- factors that influence decisions can have consortium-wide impact

# Fiscal Year Differences

- year-end differences between consortium members
- timing of "special" package offers will not always work for all member libraries

# Vendor Timelines

- tight decision making timelines imposed by vendors
- individual member libraries possibly unable to make evidence-based decision within available time

# Library Context

- collections budgets
- stakeholders
- mandates
- decision-making processes

# It's All About Timing...

- decisions to add ebook holdings may not be made simultaneously
- collections timelines don't always match up with Bibliographic Services workflow
- bibebook "New Ebook Collection" emails

# Added Holdings

- ebook holdings already in NEOS
- single title vs LARGE package
- reindexing...
- volume may necessitate delay in loading
  - users don't know they have access to content

# "Free" Ebook Collections

- "Why does Grand Prairie & Keyano have that book, and we don't?"
- load records for all libraries as NEOS default?
- load holdings only for those who want the content?
- "free" added holdings...

# Deselection

- removal of holdings for single records
- removal of holdings for collections
- removal of holdings for 1 or more member libraries (but not all)
- sometimes deselection decision is made for us by vendor/publisher

# Decisions Made. Next Step: Cataloging

# Intro to bulk-loading

First started bulk loading in 2004

Over 1.15 million ebook records in NEOS

UA Ebook cataloguers:

retrieve

edit

load

# What is bulk loading?

Global editing of large number of records

Batch ingestion in the catalogue

Regular updates

usually once or twice per month

# New content procedures

Are MARC records available?

Who subscribes?

Will there be title updates?

How to get records?

Are MARC records usable?

# Record quality check

1. Unique identifier
2. Fixed fields
3. Serials
4. Bibliographic detail
5. Online resource descriptors
6. Authorities & added entries
7. Access

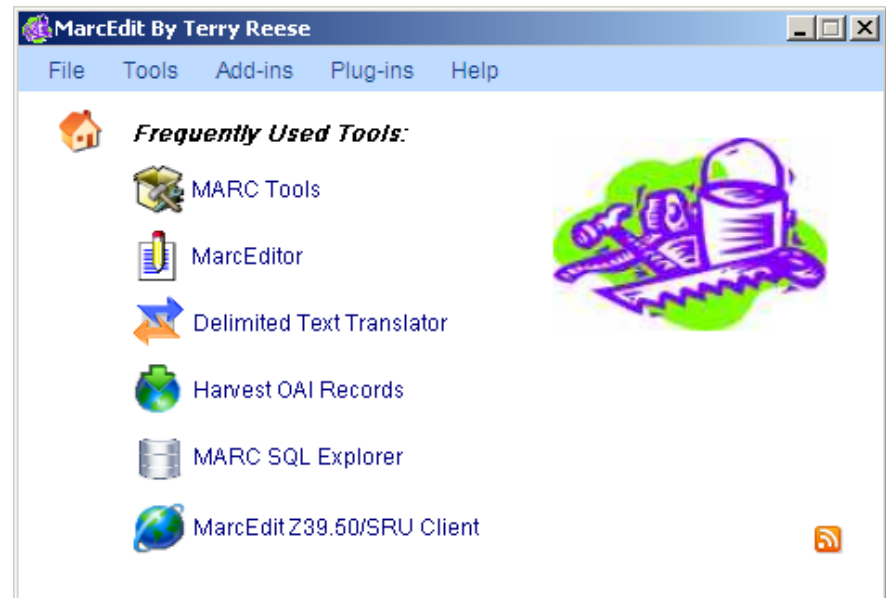

# Editing MARC records

All records need some editing

Time between retrieval, editing and loading varies

Software - MarcEdit
